

How to cut your anti slip timber decking boards

Step 1:

Begin by marking the board at the desired length, use a set square to mark across the inserts.

Step 2:

Using a diamond disk blade and a hand held 100mm angle grinder, cut through the aggregate only.

Step 3:

Finally, cut through the rest of the timber board with a chop saw or hand saw.

A detailed cutting video can be found at www.gripsure.co.uk
